

Did you ever ask yourself: what is the difference between my flying and the flying of a World- or European Champion?

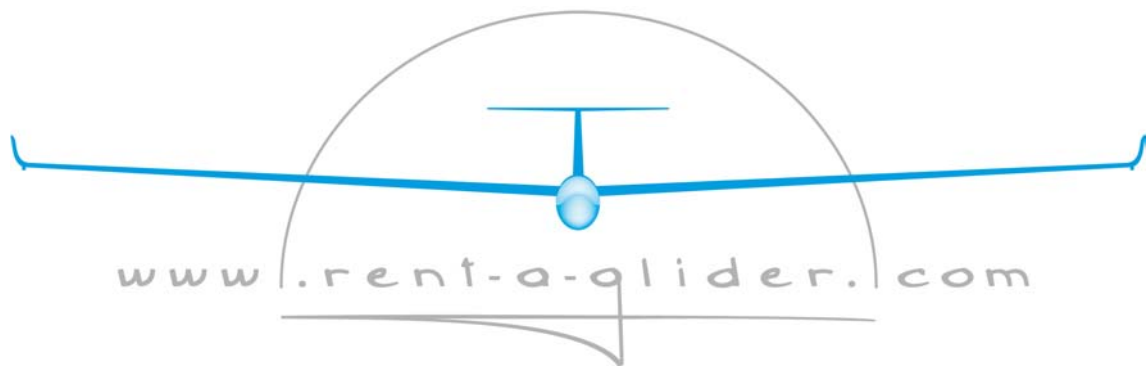

Do you want to know?

Maybe we have the answer for you!

- Who? The Champions are: **Janusz Centka, Andy Davis, Stefano Ghiorzo, Pete Harvey, Wolfgang Janowitsch, Holger Karow, Reinhard Schramme** and **Uli Schwenk**, all of them former World- or European Champions.
- Where? Kiripotib, Namibia, about 150km southeast of Windhoek.
- When? We offer 7-day courses on the following dates:
1st – 7th November 2013 and
8th – 14th November 2013.
- How? In double-seaters a direct transfer of knowledge is possible. With his feedback the coach supports the development of the trainee's physical and mental skills. The structured training ensures defined goals. We offer the tools for further individual development after the seminar.
Planned are 6 flying days, one reserve day.

Language used: English, individually also German.

The idea:

Nowadays most glider pilots are not prepared for the long path to gain all the necessary experience to become a champion on their own.

Modern double-seaters with easy handling can help us to find a shortcut.

With its stable weather pattern Namibia offers the ideal conditions for training all thermal soaring-skills.

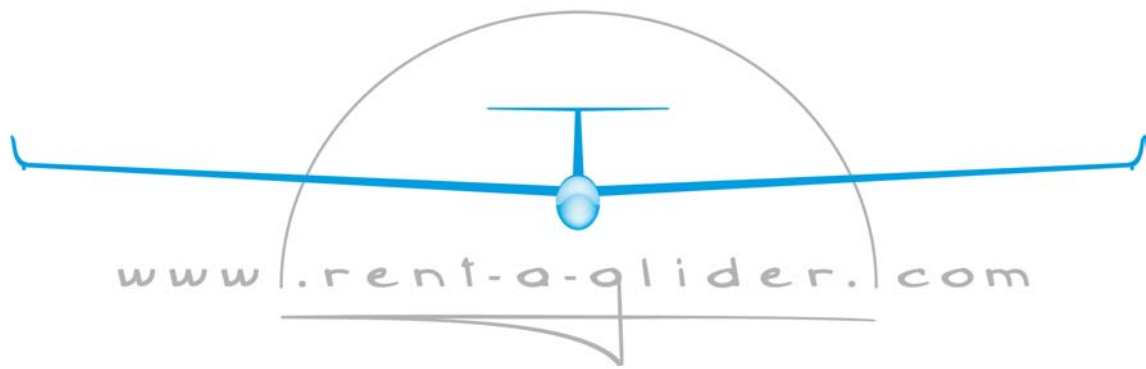

Our qualified personnel is ready to help you. 8 champions will be coaching you, in the morning with preparing tasks and goals for the day,

in the cockpit with immediate feedback, and after flight with a detailed debriefing.

The persons:

Organisation: **Ludwig Starkl, Christian Hynek, Bernd Dolba**

Coaches: **Janusz Centka, Andy Davis, Stefano Ghiorzo, Pete Harvey,
Wolfgang Janowitsch, Holger Karow, Reinhard Schramme, Uli Schwenk**

Our offer:

Gliders available are several Arcus and ASH25. They are in perfect condition, equipped with the best instruments. Waypoints and airspace are up to date in the gliding-computers.

First thing in the morning is a common weather briefing. Thereafter a personal goal is defined together with the coach.

On some days a competition task will be set and flown together. In the evening the day will be analyzed and discussed within the group.

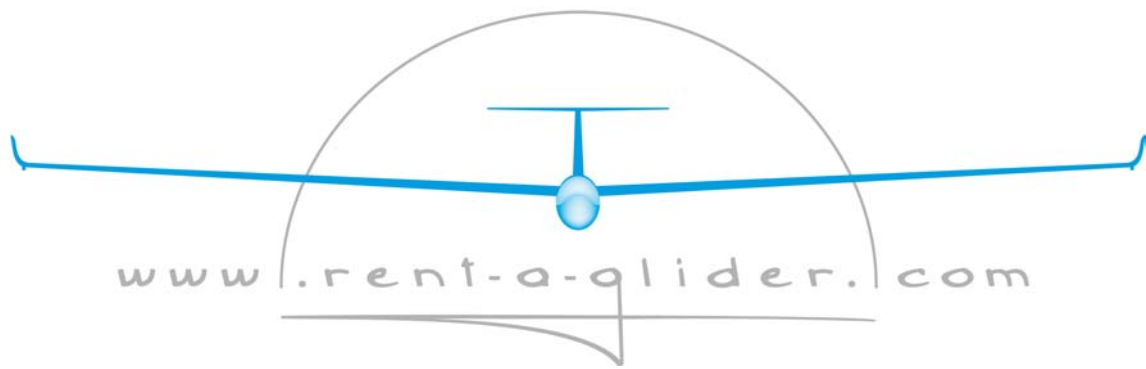

Experience shows extraordinary progress with these methods. “Bad habits” created in years of lonely single-seater-flying, can be detected and corrected easily. This doesn’t only concern manual flying (scanning, control-inputs...), but also the mental state (decision making, negative beliefs, risk management...).

To get the chance to learn from more than one expert, the pairings are changed in the middle of the course.

Apart from the immediate progress, you will get an idea about your strong and weaker points. Therefore you will have a tool for further individual training.

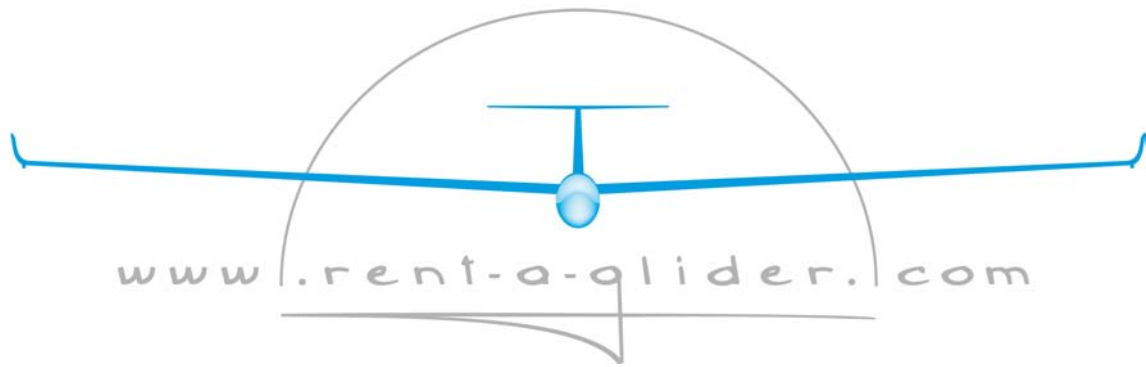

On request you can also participate with a single-seater. In this case you take advantage of the common activities (weather briefing, structuring your training schedule, flying in the group, with or without competition).

If you wish to implement the lessons learned right after the seminar, you should book the required glider early!

We are happy to support you in any way in preparing this trip. If you wish, we organize airline tickets, car-rental or possible other activities for you or your company, to make it an unforgettable event

How much is it?

Entry fee: € 5.500,-

This includes all the costs for:

Glider, individual coaching by one of the Champions, navigation- and seminar documents, membership fee, all support needed for flight operations (briefing, ground handling, landing fee...), WLAN, transfer from and to Windhoek Airport, 8 days accommodation, full board

including afternoon tea/coffee and cake, VAT and tourist tax.

This calculation is based on the price for a „Guest House Double“. If a room of another category is booked, the difference will be credited or charged as appropriate.

Not included are costs for fuel & oxygen, drinks & personal expenses.

This event is organized by
Rent-a-Glider GesmbH

We are looking forward to your enquiry!
